Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 35-37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "reinforcing members extending across only one peak and one valley in each of the plurality of cylindrical elements" lacks support in the specification. As claimed, the limitation implies only one peak and one valley in each ring contains a reinforcing member **or** reinforcing members that extend across one peak and valley. None of Applicant's figures or the specification disclose either embodiment.

Claim Objections

Claim 25 is objected to because of the following informalities: in line 8 of claim 25 "having" should be deleted or replaced with ---being---. Appropriate correction is required.

Oath/Declaration

1. The declaration filed on 10-27-03 under 37 CFR 1.131 has been considered but is ineffective to overcome the Killion reference.
2. The evidence submitted is insufficient to establish diligence from a date prior to the date of reduction to practice of the Killion reference to either a constructive reduction to practice or an actual reduction to practice. MPEP 715.07(a) requires evidence of facts establishing diligence.
3. The evidence submitted is insufficient to establish a conception of the invention prior to the effective date of the Killion reference. While conception is the mental part of the inventive act, it must be capable of proof, such as by demonstrative evidence or by a complete disclosure to another. Conception is more than a vague idea of how to solve a problem. The requisite means themselves and their interaction must also be comprehended. See *Mergenthaler v. Scudder*, 1897 C.D. 724, 81 O.G. 1417 (D.C. Cir. 1897). Specifically, the declaration lacks support for every claim limitation currently pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3738

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 24,26,29,31,32,33,38 are rejected under 35 U.S.C. 102(e) as being anticipated by Killion US PN 5,868,781.

See figure 4b (as detailed on page 5 of the last office action) specifically showing location of the cylindrical rings, reinforcing members, and interconnecting members in figure 4B. Also see lines 16-27 of column 5.

3. Claims 26,29,31,32,33,34 are rejected under 35 U.S.C. 102(e) as being anticipated by Klein US PN 5,593,442.

See figure 4B (as detailed on page 4 of the last office action) below specifically showing location of the cylindrical rings, reinforcing members, and interconnecting

Art Unit: 3738

members. Also see abstract and lines 61-64 of col. 4 incorporating US PN 5,102,417, which discloses in lines 3-34 of col. 11 coatings for stents.

FIG. 4B

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3738

5. Claims 25 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Killion US PN 5,868,781 as applied to claims 24 and 26 above and in further view of Palmaz US PN 5,102,417.

Killion meets the structural limitations of claims 25 and 34 but lacks the express written disclosure of including a biocompatible coating. Palmaz teaches in lines 3-34 of col. 11 a stent having biocompatible coatings such as drug delivery coatings to provide therapeutic benefits after implantation.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to have modified the stent disclosed by Killion by including a coating as taught by Palmaz in order to provide therapeutic benefits after implantation.

Allowable Subject Matter

6. Claims 27,28,30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3738

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
